Dear Hiring Manager,

05 April, 2023

I am excited to apply for the position of Junior Front End Developer at your organization. As a recent graduate of a full stack Bootcamp, I have gained in-depth knowledge and experience in front-end web development, particularly in HTML, CSS, Bootstrap, GitHub, and JavaScript (ongoing efforts in learning and improving JavaScript skills through self-study, or hands-on coding projects).

I understand that your organization is looking for someone with expertise in front-end development, and I am confident that my skills and passion for this field make me the perfect fit for this role. Although I have some familiarity with back-end development, my primary focus has always been on front-end technologies.

During my Bootcamp, I worked on several projects that allowed me to gain experience in building responsive and user-friendly web applications. I am particularly skilled in using HTML, CSS, and Bootstrap to create visually appealing and interactive user interfaces. I have also worked with JavaScript and I'm still learning other frameworks and opened about it.

In addition to my technical skills, I am a quick learner and a team player who is always eager to collaborate with others to achieve common goals. I am confident that my skills, experience, and passion for front-end development and always thirsty to learn more make me a valuable asset to your organization.

Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further.

Sincerely,

Jacob Dintu
